Calm Equine

- ▶ **Calm Equine** is designed as a single daily dose supplement for excitable or stressed horses and ponies.

Occasionally a horse may need a loading dose morning and evening for 2 - 3 days before settling on one dose daily.

- ▶ **Who uses Calm Equine?**

Top showjumping riders on their horses. Helping them to achieve maximum performance and aiding concentration of their horses.

Horse and pony riders to help settle blood ponies jumping top tracks all over Europe.

Dressage riders – to get the best out of their equine friends and to keep all aspects of their performance relaxed and smooth.

Stud farms – helping to keep yearlings and foals relaxed during sales preparation and at horse sales.

Racehorse trainers - on excitable hard to handle horses who suffer from stress and anxiety.

Calm Equine – Giving Peace Of Mind to Equestrians everywhere.

Calm Equine

Results

Calm Equine is designed to make your horses or pony less anxious and more manageable in situations of extreme stress. Containing high levels of L-Tryptophan an essential amino acid precursor to serotonin, a critical neurotransmitter for stabilizing mood and relieving panic and anxiety. L-Tryptophan also supports muscle tone and maintains natural calm behaviour. L-Tryptophan also plays an important role for the immune system. It helps to regulate the production of antibodies that help the horse fight off infection and disease. Calm Equine also contains Selenium a trace mineral which is essential for cellular function in the body and plays a vital role with immunity and has well documented antioxidative properties.

Calm Equine also contains high levels of Magnesium (Mg) an essential mineral that horses require for proper nerve and muscle function. Magnesium functions as an electrolyte, plays a role in protein synthesis and is involved in over 300 metabolic processes in the horse's body. It can improve tolerance to stress and resistance to illness and injury. Stress causes magnesium to be depleted in the body faster. Ensuring optimal magnesium levels can help speed up return to homeostasis following exposure to an external stressor.

- ✓ Reduces stress
- ✓ Aid Immunity
- ✓ Makes your horse more manageable
- ✓ Supports focus and concentration

Ingredients Per 50g

Analytical Constituents: Calcium 3.3% 1.65 g, Phosphorous 0, Sodium 0, Magnesium 33%

Amino Acids: L-Tryptophan 4,000 mg per 50 g

Trace Elements: Selenium 1 mg per 50 g

Composition: Magnesium Oxide, Marine Magnesium Oxide, Mearl, Dextrose, Calcium Carbonate

Vitamins: Vitamin B 1 500 mg per 50g

Storage: Store in a cool, dry place.

Feeding Guide

Calm Equine should be added to the feed at the rate of 50 g per day i.e. 1 level 25 g scoop morning and 1 level 25 g scoop evening.

Feeding Guide: 1 Scoop = 25g

Shelf life: 24 months

Sizes Available

KG

2KG: 40 Days supply Horse / 180 Foals
